But there is a problem with that! Everybody think of Swedes like blond, tall, thin girls with big boobs! In many movies there is like a Swedish girl with just the looks I described and the only thing she says is like "Hej, vill du ligga med mej?". That means "Hi do you want to have sex with me?" It´s kind of annoying that you´re like a sex object in everybody´s eyes! What´s your opinions about Swedes?
